

CAPABILITY HIGHLIGHTS

- **GAGE DESIGN**

Engineering staff with extensive experience in design and fabrication of precision measuring instruments and calibration standards

- **MANUFACTURE**

Precision grind shop with high precision grinders with ultra precision readouts. In-house hard chrome plating and heat treating assures quality and minimizes product lead times

- **GAGE LAPPING**

Proprietary O.D., I.D. and Flat lapping equipment are utilized in finishing master gages to ultra precision tolerances

- **CALIBRATION**

Metrology lab with precision temperature control and air filtering. Equipped with lab grade reference standards, electromechanical and laser interferometer calibration instruments

- **TEST**

Pneumatic and electronic test benches for testing and calibrating of Gage Readouts
